

American Telesis acquires Synergy Networks

American Telesis (Booth #602), a facilities based carrier offering a complete suite of Data and IP Products across the U. S. and Canada, is pleased to announce that it has acquired Synergy Networks, a U.S. based company that provides network services to firms within the financial industry. Monica J. Bauer, Vice President of Operations told us, "We are excited about the consistent and continued growth here at American Telesis. Our network has been strengthened by increasing our partnerships with other providers and the integration of the Synergy Network. This growth augments the options we can offer our Agents for end-to-end network solutions."

Heather J. Selbert, Managing Director of Operations was a featured presenter in March at the Mandalay Bay Show, where she shared information with participants regarding the Wide World of WANs. At the show in Chicago, American Telesis will continue to take the complexity out of network solutions (WANs, LANS, MANs, MPLS, Ethernet, Internet, Private Lines, IPVPN, Frame Relay, DSL, SLA, QoS, Managed Services, Disaster Recovery, and CoS). American Telesis will be working with Agents to help them develop winning solutions tailored to their clients' current and future needs. A great deal of focus will be on the security of private networks and the wide range of connectivity options as well as providing Agents and Resellers with cost effective solutions and a competitive edge.

Ms. Bauer concluded, "Listening to the needs of users is crucial. It is essential for us to provide our customers the right mix of services to support their current environment and future growth requirements. At the same time we must ensure that we are continuing to support the products with the same high-level of service. The personalized attention we deliver, coupled with our integrity, diversity and expertise make all the difference to our clients. We want to thank our existing Agents and Resellers for their business and are excited to talk with them at the show. We are also looking forward to extending our reach to new Agent relationships."
