AMERICAN TELESIS
Private Line & Network Specialists

American Telesis' Dedicated Internet Access (DIA) services offer superior solutions for organizations and groups that need full-time, high availability Internet access with maximum performance. With so much hanging in the balance, corporations need to be certain of network uptime, security, scalability and customer support. American Telesis meets and exceeds these challenges with our Internet Services.

American Telesis' DIA is available at access speeds from 56Kbps to OC-x and 1.5Mb to 10Gb Ethernet.

Sample Applications

External communications – E-Mail | Data-streaming – Data transfer and software downloads
E-commerce – Sales, Marketing, and Purchasing online
ASP Connectivity | ECRM support – Order / status online

Benefits

Grow painlessly with dynamic products that give you flexibility to accommodate increases in your Internet usage.

Save money and streamline your operations by selecting the most appropriate bandwidth for your present and projected needs.

Get better network customer service, improved productivity and more sales opportunities.

Take advantage of the trained, qualified team of professionals who install and maintain your Internet services.

Installation Engineers fully support and monitor your Internet access with the power, quality, and reliability that you require.

Timely installation and consistent, reliable bandwidth
teamed with truly helpful and
friendly customer service and support,
make American Telesis the best choice.
